COMPANY

WHO WE ARE

Allied Instrumentation is an instrumentation, safety and heat trace focused solutions company offering outstanding service and a trusted array of quality products. Capabilities include service, calibration, custom engineered solutions, heat trace design, control valves, quarter turn valves, mechanical products, and an extensive inventory.

Allied Valve is a Midwest based turnkey sales and service provider of general, severe service and custom engineered control, isolation, quarter turn valve packages, actuation, and overpressure protection solutions. Shop, field and mobile repair capabilities support the Oil & Gas upstream, downstream, midstream, petrochemical, fertilizer, power, pulp/paper, and ethanol industries. Allied Valve also specializes in API6D pipeline valve repair and actuation repair/modification services across North America.

Automation Service is a St. Louis based remanufacturer of Fisher control valves, remanufactured Rosemount®, Foxboro & Honeywell instrumentation, and the OEM new manufacturer for legacy Foxboro pneumatic instrumentation. Automation Service also provides reclamation & recycling services for all products listed above, at no cost to its customers.

Chemelex Raychem is a global leader in electric heat trace and control solutions providing freeze protection and temperature maintenance for both industrial and commercial customers.

Conhagen is a brand agnostic rotating equipment services company specializing in turbines, compressors, pumps, blowers, and gearbox repair. Shop and field service capabilities include reconditioning, parts manufacturing, rerate and redesign, condition monitoring, and engineering services. Locations now include Louisiana, Texas, Northern California and Joliet, Illinois.

Continental Disc Corporation a Baker Hughes brand - manufacturers rupture discs, disc holders and engineered solutions for over-pressure protection for oil & gas, petrochemical, power generation, pulp & paper, ethanol, foods processing and pharmaceuticals markets.

Consolidated is a Baker Hughes valve brand with over 140 years of experience designing and manufacturing industrial pressure relief and safety valves for overpressure protection in critical applications across all industries. An industry leader with innovative technical solutions for the worlds most challenging applications. Full scope ASME I & VIII portfolio with documented value and performance benefits.

Groth Corporation a Baker Hughes brand - manufacturers emergency pressure & vacuum relief valves, pilot operated relief valves, pressure and vacuum flame arrestors, detonation and deflagration flame arrestors and blanket gas regulators for the oil & gas, petrochemical, fertilizer, ethanol, pharmaceutical, food & beverage and wastewater industries.

COMPANY

WHO WE ARE

Hayes Pump, Inc. is a Northeast based best-in-class pump distributor specializing in the supply and service of industrial pumps, engineered pumps systems and control systems, fuel oil pump sets, in-line strainers and mechanical seals for the industrial, commercial, and municipal markets.

J~S Machine & Valve is a nationwide specialized industrial valve repair and service provider offering shop and field valve repair services, valve modification, machining, welding, and outage/turnaround support. Specialties include in line machining and repair for pressure seal gate valves, in line checks, slide valves, severe service ball valves, factory authorized Coker Wedgeplug repairs, HF Alky valve decontamination and repair services and API6D pipeline valves. J~S Machine and Valves provide service support across the downstream refining, power, and midstream markets across the US.

Lamons is a global manufacturer and supplier of high-performance gaskets, seals, hoses, bolting, fasteners, and expansion joints. Offering both off the shelf and custom engineered solutions for the Oil & Gas, Petrochemical, Power, Metals, Mining, Ethanol and Water/Wastewater markets.

Masoneilan, a Baker Hughes brand is a global manufacturing leader in control valve and digital instrumentation solutions. Providing advanced flow control technologies for general and severe service control applications across all industries.

M&C TechGroup, now owned by MSA, is a leading provide of process gas sampling and gas conditioning systems plus an extensive offering of in-situ TDLS.

Millennium Power Services is a Massachusetts based outage and turnaround services provider for field machining services, line valve repairs, control valve repairs, actuation repair, and safety relief valve repairs. Millennium is an authorized repair center for Copes Vulcan and specializes in CCI repairs, with in-house parts manufacturing capabilities. Outage and turnaround services support the Power, Oil & Gas, Petrochemical, Pipeline, Steel and Pulp & Paper industries nationwide.

MSA Safety and General Monitors is the global leader in fixed gas and flame detection systems providing reliable, SIL-capable monitoring for combustible, toxic, and oxygen deficient atmospheres and flame detection found in industrial environments.

Panametrics offers custom solutions for measuring and analyzing moisture, oxygen, liquid, steam, and gas flow with proven technologies that are well-known and widely deployed across many industries, including oil and gas.

Promation Engineering manufactures heavyduty industrial electric actuators and valve automation solutions designed for harsh environments, offering quarterturn, springreturn, and explosionproof models, emphasizing reliability, modular controls for industrial flow control applications.

COMPANY

WHO WE ARE

REXA® is a Boston based engineered actuation manufacturing company which specializes in rotary, linear drive electro-hydraulic actuation packages. Benefits include precision accuracy, repeatable control, minimal maintenance, and long-term reliability for critical service applications found in the downstream refining, midstream, petrochemical, power, steel, and ethanol markets.

SofTek Engineering® is an industry leader in advanced control, block and pressure relief valve diagnostic testing equipment and software for use in troubleshooting, performance testing, functional testing, and quality assurance. A partner of Ovation Holdings portfolio of valve service companies.

SOS Leak Repair is an industrial leak repair solutions provider which offers 24/7 leak seal repair under full process pressure and flow conditions. Service includes emissions control, flange repairs, valve, tank and pipe repairs, engineered clamps, field machining and precision freezing.

Velan Power is a global leader in designing and manufacturing general and severe service pressure seal, gates, globes, checks, ball, triple offset-butterfly valves, and steam traps. New project support and aftermarket services are available.

Valve Sales Inc. is a Tulsa and West Texas based turnkey sales and service provider of general, severe service and custom engineered control, isolation, quarter turn valve packages, actuation, and overpressure protection solutions. Shop, field and mobile repair capabilities support the Oil & Gas upstream, downstream, midstream, petrochemical, fertilizer, power, pulp/paper, and ethanol industries.

VTORK Technology is a manufacturer of valve automation products which include pneumatic rack and pinion, pneumatic scotch yoke, electric quarter-turn fail safe, electric multi-turn and declutchable manual gear over-rides.

Turnkey Instrument Solutions provides ISO17025 certified calibration services along with comprehensive process instrumentation support, offering true turnkey installation, maintenance, and troubleshooting for industrial measurement and control systems. Based in Indianapolis, Turnkey Instrument Solutions is an Allied Instrumentation company.

Yokogawa is a global provider of industrial automation, process control, measurement, and information solutions that help optimize operations, safety, and efficiency across energy, chemicals, pharmaceuticals, and other industries.
